

- Change the width and height of an image to 200 pixels both.
- Create an *OutlinedButton* widget that displays the text *Cancel*.
- Create a function called *cancel* that prints *Cancel button is clicked*, and pass it to the *onPressed* parameter of the *OutlinedButton* widget created in the previous step.
- Change the background color of the *OutlinedButton* widget to *Colors.purple*.
- Add a padding of 10 pixels to the *OutlinedButton* widget at the **top and bottom** only.
- Add a padding of 60 pixels to the *OutlinedButton* widget using *SizeBox* widget.

```
import 'package:flutter/material.dart';

void main() => runApp(MyApp());

class MyApp extends StatelessWidget {
  void cancel() {
    print('Cancel button is clicked');
  }

  @override
  Widget build(BuildContext context) {
```

```

return MaterialApp(
  home: Scaffold(
    appBar: AppBar(
      title: Text('OutlinedButton'),
      backgroundColor: Colors.purple,
    ),
    body: Center(
      child: Column(
        mainAxisAlignment: MainAxisAlignment.center,
        children: [
          Image.network(
            "https://uploads-
ssl.webflow.com/5f841209f4e71b2d70034471/60bb4a2e143f632da3e56aea_Flutter%20app%20development%20(2).png",
            width: 200,
            height: 200,
          ),
          const SizedBox(height: 10),
          OutlinedButton(
            onPressed: cancel,
            child: Text('Cancel'),
          ),
          const SizedBox(height: 10),
        ],
      ),
    ),
  ),
);
}

```
